Cross-Architecture Training Convergence & Efficiency Benchmark
Evolving Micro-Head SSM vs. Standard Transformer Decoder-Only (NVIDIA RTX 5060 Ti Blackwell SM120)

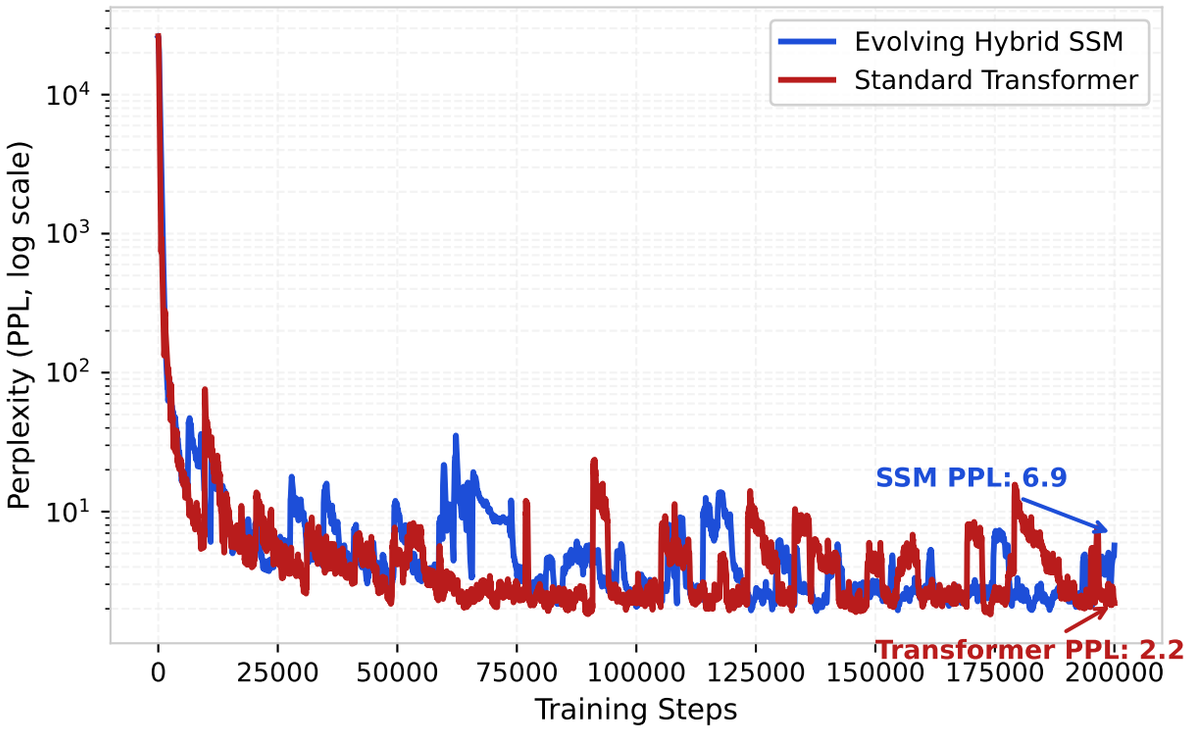

1. Cross-Entropy Loss Comparison (Steps 1 – 200,000)

3. Long-Term Convergence Trajectory (Hybrid SSM to 435k Steps)

2. Perplexity (PPL) Convergence (Log Scale)

4. Hardware Efficiency & Runtime Comparison (RTX 5060 Ti)
